Global Remote Technologies Announces Appointment of New President

Vancouver, B.C. - (September 9, 2015) Global Remote Technologies Ltd. ("**Global Remote Technologies**" or the "**Company**") (CSX:RGT) is pleased to announce that on September 9, 2015, Kane Smith joined the Company as the President and a director and will report to Chris Dorris, CEO. Mr. Smith's' appointment follows the resignation of Chris Dorris as President. Mr. Dorris will stay on as CEO and a director.

About Kane Smith

Kane Smith comes to Global Remote Technologies with more than a decade of experience, including management of multiple oil and gas projects, general construction projects, and various positions and duties with the US army. He holds a Bachelor of Science in Applied Science from Campbell University in Buies Creek, North Carolina, and graduated from the Harvard Business School Owner/President Management program in 2013.

Mr. Smith founded North American Energy Holdings LLC in 2014 after completing several years of independent consulting contracts HSE (health, safety, and environment) and HSSE (health, safety, security, and environment) supervisor / inspector for EXCO, DXP, Access Midstream, DHW Oilfield Services, Newfield Resources, and Chesapeake Energy.

"Mr. Smith brings extensive leadership experience within the oil and gas service industry and will assist the Company greatly with its continued development of business in the US, Mexico and Canada" stated Chris Dorris, CEO.

About Global Remote Technologies

Global Remote Technologies focuses on the deployment of emerging technologies for the energy sector. The Company has licensed multiple patent pending tools for the oil and gas industry, which are currently being assembled for release in later 2015. Using its advanced engineering and leadership experience, Global Remote Technologies brings cutting edge processes and technology to the oil patch. Its remote sensor packages transmit telemetry from drilling and production sites in real time to a central server where it is viewed in the cloud. The systems are designed to provide key personnel an early warning system to avoid equipment failures or costly compliance fines. Global Remote Technologies collects and communicates vital information on the status of equipment, tanks, and pipelines for exploration, production, and transmission of oil, gas and water. The Company is headquartered in Vancouver, BC, with offices in Denver, Colorado and Houston, Texas.

Further information about the Global Remote Technologies is available under its profile on the SEDAR website, www.sedar.com, on the CSE website, www.thecse.com, and the Company's website, www.grtcse.com.
