**GLOBAL REMOTE TECHNOLOGIES' EXECUTIVE LEADERSHIP  
SETS AGGRESSIVE GOALS FOR NEW CONTRACTS AND CUSTOMERS  
FOR THE 4TH QUARTER OF 2015**

Vancouver, B.C. – (October 30, 2015) Global Remote Technologies Ltd. (the “**Company**”) (CSE:RGT), Frankfurt Stock Exchange:GR9) is excited to announce an aggressive target for new customers and contracts for its products for the last quarter of 2015.

Senior leadership is confident that with the continued progressions and successes of the Company's services, it will be able to contract with an additional 8 new customers in the last quarter. Specifically, management expects that the Company's recent acquisition of a Helix downhole well simulation tool, equipment, and technology, will greatly increase demand for its services in the oil and gas industry and in particular, anticipates rapid expansion of its business into the Eagle Ford Shale area in South Texas and the Haynesville Shale area in East Texas and Louisiana. For more information about the Helix tool, equipment, and technology, please refer to the Company's news release issued on October 27, 2015.

Chris Dorris, CEO of the Company, stated, “I believe that it is important for us to show that we are able to grow in a down market. I am very positive that we can meet this goal before the end of the fiscal year. Finishing strong is a high priority for us”.

**About Global Remote Technologies**

The Company focuses on the deployment of emerging technologies for the energy sector. The Company has licensed multiple patent pending tools for the oil and gas industry. Using its advanced engineering and leadership experience, the Company brings cutting edge processes and technology to the oil patch. Its remote sensor packages transmit telemetry from drilling and production sites in real time to a central server where it is viewed in the cloud. The systems are designed to provide key personnel an early warning system to avoid equipment failures or costly compliance fines. The Company collects and communicates vital information on the status of equipment, tanks, and pipelines for exploration, production, and transmission of oil, gas and water. In addition, the Company recently acquired a Helix downhole well simulation tool and related technology. The tool uses a patent pending design and engineering method to achieve a unique flow pattern for wellbore simulation. The Company is headquartered in Vancouver, BC, with offices in Denver, Colorado and Houston, Texas.
