T2 PORTABLE COMMUNICATION

Maintain connectivity with the compact T-2 portable communications package, which uses alternative energy sources power the device.

T2 Portable Communications Packages are compact size, light weight, and self-powered, and support secure voice and data connectivity in the most remote locations around the world. They are self-sustained by off the grid sources -- vehicle, solar, wind, and hydrogen fuel cell -- ensuring reliable communication through extended periods in virtually any environment. The T2 system is designed to connect people in even the most rugged environments. Video and radio options are available.
